EXPERIENCE

Software Developer

GoMAXPAIN | Dec 2025 – Present
Remote, United States

- Engineered scalable web scraping systems collecting **~500,000 verified professional records** across **7 U.S. states** to support outbound B2B outreach
- Developed resilient **Playwright-based automation** capable of **multi-day execution**, handling dynamic pages, retries, and failure recovery
- Standardized, cleaned, and deduplicated large datasets to ensure **accuracy, consistency, and production usability**
- Reduced reliance on unreliable legacy datasets by delivering **internally-owned, high-quality lead data**
- Collaborated with internal teams to validate scraped data and provided **front-end QA feedback** during testing cycles
- Translated Figma designs into production-ready web pages, ensuring visual accuracy and performance
- Refactored and updated existing pages to improve responsiveness and maintain design consistency across breakpoints

Tech Stack: Playwright, Python, Pandas, Web scraping, Automation, React, TailwindCSS, tsx

Full Stack Engineer

Tamayoz Real Estate | Apr 2025 – May 2025
Remote, Egypt

- Developed a full-stack property management system including dynamic property show pages and admin CRUD.
- Added 4+ system modules enhancing property management workflows.
- Improved dashboard usability, reducing task completion time by ~35%.
- Built secure REST APIs with Express.js & MongoDB and optimized queries for ~20% faster responses.
- Developed a fully responsive interface using React and Tailwind CSS.

PROJECTS

Student Management Platform (Freelance)

[live](#), [code](#)

- Reduced manual record-keeping time by ~70% through automated session logging.
- Centralized attendance, notes, and progress history into a unified platform.
- Delivered real-time oversight through a secure admin dashboard.

Tech Stack: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

Property Management System (Freelance)

[live](#), [code](#)

- Developed a full-stack application with CRUD functionality and dynamic property pages.
- Created a responsive UI with React and Tailwind CSS.
- Engineered secure REST APIs using Express.js & MongoDB.

Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT

SKILLS

Front-End: React.js, Tailwind CSS, HTML, CSS, JavaScript

Back-End: REST APIs, Express.js (Node.js), TypeScript, Python, FastAPI, WebSockets

Databases: MongoDB, MySQL

Other: JWT Authentication, Git, Problem Solving, Project Management, AWS (EC2), Linux
